Technical Highlights

MP47 Hectorra 3

FOR MID-LUXURY SEGMENT
VEHICLES & SUV'S

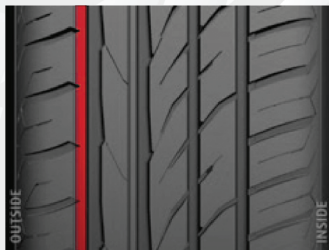

Good handling and shorter braking distances

Rigid blocks and ribs in the centre improve the transfer of traction and braking forces to the road. This results in a direct steering response. On dry roads, the handling is good and braking distances are short.

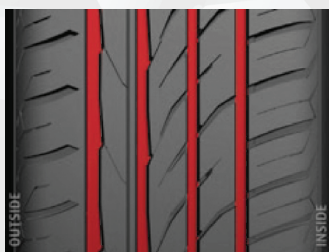

Increased mileage

The tread pattern has been optimised in terms of the distribution of material and rigidity between the tread elements. Abrasion is reduced as a result of the even pressure distribution on the contact area. This leads to increased mileage and tyre life.

High level of driving safety in the wet

Four wide grooves around the circumference hold a tremendous volume of water, improving its displacement. Driving safety is improved on wet roads and the risk of aquaplaning is reduced.

Reduced noise

The noise emissions caused by tread elements in the centre of the contact area are reduced as a result of the closed outer shoulder. This reduction in noise enhances the tyre's driving comfort.

Technical Highlights

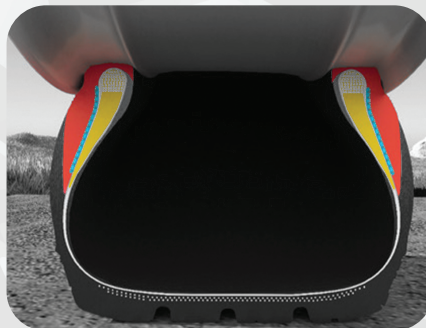

MPS300 Maxilla AP

FOR TRANSPORTERS AND
VANS

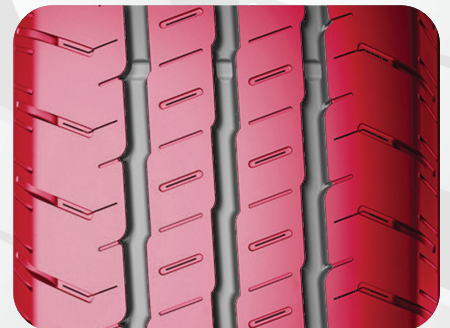

Better overall durability

The optimised sipe concept of the pattern and the reduced number of sipes provide very good protection against cuts and chips to increase the durability of the pattern.

Really robust construction

Optimal stiffness distribution among the elements and robust construction increase the tyre's load capacity and extend its service life.

Extra mileage

The optimised pattern design and compound give the tyre better mileage performance and protection against stone penetration.

Technical Highlights

MP72 Izzarda A/T 2

FOR SUV'S AND PICKUP TRUCKS

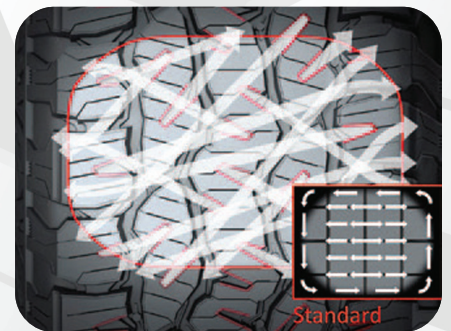

Traction like never before

The new multi-angle and terraced notches provide numerous gripping edges. This results in improved off-road traction even on loose surfaces. Alternating shoulder scoops guarantee enhanced self-cleaning action.

High level of damage resistance in off-road conditions

Robust tread blocks in combination with stabilized block edges reduce block pressure. This leads to outstanding resistance to block damage even under heavy load.

Significantly enhanced noise cancelling and ride comfort

Tread blocks with varying angles ensure a comfortable and quiet ride at all times.

Protection Features

Rim protection rib

The rim protection rib protects the tyre and wheel bead area from damage caused by curbstone and off-road obstacles.

Sidewall lugs

Large sidewall lugs on the upper sidewall protect the tyre body from stones, rocks and debris.

Stone bumpers

New stone bumpers with extension wings provide excellent protection against stone Reflection and drilling. This reduces tyre damage from stones.

NEW

Hectorra 5

For Passenger cars
and SUVs

Matador is coming with the new Hectorra 5 flagship summer tyre that offers very well balanced performance with low noise generation that delivers a pleasant driving experience. Enhanced rolling resistance and higher wear performance increase its life and fuel efficiency.

Technical Highlights

Comfort**Wet Performance****Efficiency**

Comfort

Offers a pleasant drive experience thanks to balanced tread pattern composition and optimized sipe distribution.

Efficiency

Makes driving more efficient thanks to a new compound generation. Ensures low rolling resistance and increases long-life with high wear performance

Wet Performance

Maintains optimized contact area between tread and road due to the more structured inner part of the pattern. This leads to very good braking performance on wet roads.

Technical Highlights

MP82 Conquerra 2

FOR CROSSOVERS, SUV'S
AND PICKUP TRUCKS

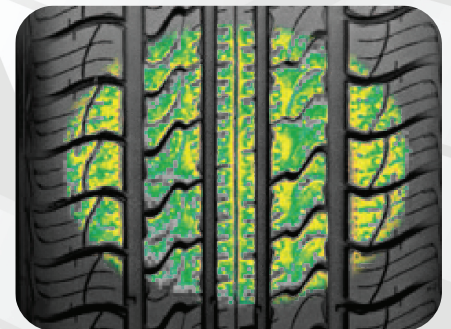

Good safety and handling performance

Compact, sturdily designed shoulder blocks increase lateral rigidity and enables the good transmission of lateral forces. Thanks to the outstanding handling, a high degree of safety is achieved.

Better driving comfort

A large number of wave-shaped sipes, which follow the block structure, enable the blocks to roll in and out smoothly. Driving comfort is improved as a result of the reduction in tyre noise.

High mileage

The new silica compound with optimised tread pattern delivers low rolling resistance, optimised pressure distribution and low wear. This also increases tyre life.
