

INAMA

QUALITY IS LIFE

Since 1999, NAMA has been providing premium-quality tires trusted across the Middle East and beyond. With registrations in over 50 countries and 15 patents, NAMA offers a complete range of tires – from passenger cars to trucks, agriculture, and industrial use.

Produced in advanced international factories, NAMA tires are designed for durability, safety, and performance in the region's toughest road and climate conditions. With 7/24 customer support, product liability insurance, and efficient logistics, NAMA is your reliable partner for growth in the Middle East market.

MAXAGGRES H/T NM-76

Straight center rib design: Improves high-speed stability.

Center rib with matrix side patterns: Helps minimize road noise at high speeds.

Unique shoulder rib design
:Reduces irregular wear and lowers road noise.

FEA simulation design:
Ensures uniform carcass structure, preventing bubbles or abnormal cracks.

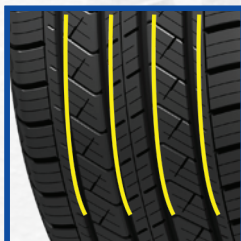

Multi-angle 3D sipes :
Deliver high grip, shorter braking distance, better water drainage, and improved heat dissipation.

Extra wide driving surface:
Increases road contact area, providing greater stability.

Excellent handling and braking performance:
Faster responsiveness and safer stopping.

Additional width (3.0–5.0 mm) on the tread:
Enhances control and stability.

MAXMACH NM-31TH

Wider driving surface designing, stable control and braking performance.

Varipitch optimized combination design to effectively reduce noise and bring quieter driving experience.

The sea-land ratio (sea/total) on the inside of the tire shoulder effectively ensures heat dissipation and drainage and lateral control.

MAXSTAR NM-62

Speed rating

V – suitable
for speeds up
to 149 mph
(240 km/h).

Construction

Radial design
with black
sidewall
(BSW).

UTQG rating

570 treadwear
and A traction
for durability
and grip.
